Hello,

I am a passionate UX Designer and Developer with a human-centered approach who follows agile methodology. I excel at both high-level systems thinking and detail-oriented problem solving. My background in management and photography shaped my key strengths in empathically understanding humans, strategic planning and problem solving. I am motivated by curiosity and I believe great design is centered around communication.

Work

UX DESIGNER @ CLIMAX MEDIA

(Contract) - Current

Created the user flow and experience for Canon's consumer, professional and business clients. Using human-centered design principals, I was able to define problems and find solutions through research. Delivered wireframes and interaction model for the development team with production in mind.

MENTOR @ HACKERYOU

Current

Providing assistance to instructor, and guiding students through HTML, CSS, jQuery basics and best practices during Part-Time Web Development class.

FRONT END DEVELOPER @ DEMAC MEDIA

Jun /15 - Oct /16

Developed eCommerce stores from designs and prototypes utilizing the Magento platform, and writing in languages such as PHTML, PHP, XML, Sass, and jQuery.
